INSURANCE MARKING TRACKING

OXYGEN CUBED

The only solution that guarantees a 100% protection against theft

NEC

Breathe easy, your notebook is safe

OXYGEN CUBED

Three times the protection for your notebook

Oxygen Cubed : a complete package that brings insurance, marking and Internet hardware tracking together with a unique identification number for your hardware.

Three-year insurance :

In association with AGF, **Oxygen Cubed** repays the price as new if your computer is stolen within three years. Your guaranteed repayment means hardware can be replaced paridly, without rapidly, without business interruption.

Indelibly marked hardware :

Oxygen Cubed uses an exclusive, internationally-patented system for marking hardware. For immediate recognition, a number plate with your unique identification code is bonded in place with ultra-strong adhesive that withstands up to 400kg pulling force. In case of removal, it reveals the indelible message : "Stolen hardware". Simply marking your hardware deters theft by making re-sale harder.

Internet hardware tracking system:

Once connected, **Oxygen Cubed**'s Internet software keeps track of your hardware from a central server by recognising its unique identification number. Thanks to this international search, your hardware can be pinpointed and recovered in co-operation with the police.
